## Orange Scrub

P/N

IHOS500 – 500ml

IHOS5 - 5 Litre

IHOS20 – 20L

Orange Scrub is a heavy-duty hand cleaner containing high quality citrus oils and a fast working pumice abrasive. It is designed to remove most industrial soils including dirt – mud – dusts - coal dusts – oils - greases and solvents.

Orange Scrub contains no petroleum solvents and is pH controlled to more closely match that of the skin. This provides a high level of skin compatibility.

Orange Scrub also provides natural moisturizing and super- fattening to the skin through the incorporation of a lanolin derivative as well as Aloe Vera - vitamin E and jojoba oil. Orange Scrub contains a fine grade of pumice to gently remove ingrained dirt - without the harshness associated with coarser grade abrasives.

## Eliminator

P/N

IHPE500 - 500ml

IHPE4 – 4L

IHPE20 – 20L

**Eliminator** is a specialty hand cleaner designed specifically to remove paints - adhesives and other resin-based products which standard industrial strength hand cleaners are unable to remove. Major industries which find use for this product include spray painting and panel beating in the automotive refinish industry, the furniture industry - the paint trade - the fibreglass and composite plastic industries - the building industry and the home handyman. Eliminator is based on a unique blend of biodegradable ester solvents. No petroleum distillate solvents are used. The incorporation of ester solvents in place of petroleum distillate solvents gives eliminator its uncompromised paint and resin dissolving ability. It is therefore ideally suited for removing the following resin types: Acrylics – enamels – urethanes - epoxies - silicones and polyesters. This makes it suitable for the removal of automotive lacquers - enamel and 2pack paints - industrial coatings - marine paints and anti-fouling - household paints - varnishes & stains - furniture coating - body fillers - polyester and epoxy resins - silicone sealants - urethane & acrylic sealants and adhesives. The surfactants used in Eliminator are readily biodegradable - the pumice abrasive has been chosen for its ability to gently but efficiently clean the skin without being too harsh. The pH of Eliminator is almost neutral ensuring a substantial degree of skin compatibility and without the harshness of highly alkaline formulations. A lanolin derivative also provides natural moisturising and super-fatting to the skin.

## Hammer Finish

AAGB 400	Black 400 g
AAHFB400	BLUE 400 g
AAHFC400	CHARCOAL 400 g
AAHFS400	SILVER 400 g

Septone Hammer Finish is a self-priming - rapid **drying** hammered metal look paint. It is suitable for interior and exterior applications on both metal and timber surfaces. Once applied - it provides a tough – durable - anti-corrosive - decorative finish - which hides surface imperfections.

- Tough durable textured finish
- Available in **blue – charcoal & silver** finishes
- Quick drying
- Anti-corrosive
- Hides surface imperfections
- Easy application

**Area of Application:**

- Trade or Handyman use
- For exterior and interior metal or wooden surfaces

## Aerosol Etch Primer 400g

P/N AAEP400 - 400G

Cap colour approximates paint colour.

Septone Etch Primer is a single pack, advanced epoxy build primer which has been especially designed to promote excellent adhesion to difficult metals, be they ferrous or non-ferrous. Super Etch Primer also protects the metal from surface rust prior to painting with either enamel or acrylic top coats. Super Etch Primer is chromate free

# Aerosol Cold Gal

P/N  
AACGP - 400G

Cap colour approximates paint colour.

Septone Cold Gal - is a zinc rich epoxy coating. It provides long lasting protection from rust and corrosion by replacing damaged galvanising. Cold Gal is ideal for boat trailers – roofs – gates – balustrades - wrought iron – tanks - gutters and many other applications. It is also suitable for spot priming after welding

# SEPTONE®

Acetone 1L

P/N  
ASA1 - 1 Litre

Acetone is an extremely versatile solvent and has excellent solvency power for resins – gums – fats - oils – waxes – rubber - plastics – nitrocellulose – paints – lacquers – varnishes - adhesives and rubber cements. Acetone is commonly used in varnish and nail polish removers. It is ideal for a number of solvent and extraction applications.

Note: that Acetone attacks many plastics. Keep away from plastic eyeglass frames and lenses - pens - rayon garments and stockings - plastic jewellery - bullet-proof glass - etc

## HSS5 Superclene 5L

Septone Superclene: is a heavy-duty general-purpose cleaner/degreaser concentrate possessing quick break properties. It's unique combination of biodegradable natural orange oil extract, anionic and non-ionic surfactants and powerful builders combine to give excellent performance in almost any application.

When diluted as recommended - it can be used for virtually on any cleaning application - including degreasing - heavy duty vehicle washing - workshop floor cleaning and the cleaning of trawlers and oil rigs.

The quick break property of Septone Superclene ensures that the emulsified grease and oil rapidly separate in a grease trap - allowing the resultant water layer (after pH post-treatment) to be drained to the sewer as treated trade waste.

## Parts Wash 20L Pail

P/N

ADPW20 - 20 Litre

Parts Wash is an economical solvent cleaner especially suited for use in industrial parts washers. It will degrease and clean many hard surfaces including metals of most greases - oils and light deposits of gums and varnishes - and then evaporates to dryness. Because it contains a high flash point (65 degrees Celsius minimum) hydrocarbon solvent - it meets the Australian Petroleum Institute standards for use in parts washer equipment requiring AS1940 Class C solvents.

## TW20 Truck Wash

P/N

ATTW5 – 5L

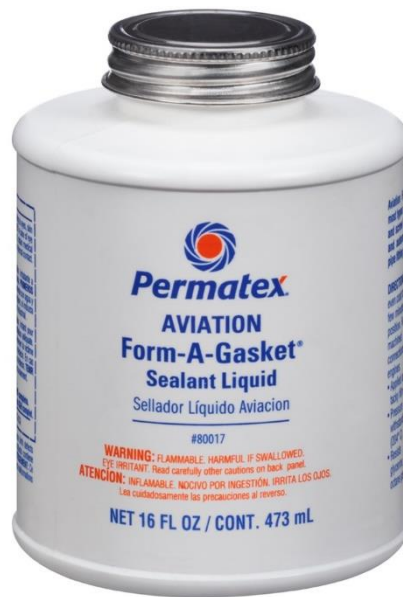

ATTW20 - 20 Litre

TW20 Truck Wash is a non-toxic - non-caustic - biodegradable heavy-duty detergent with a balanced pH and is highly effective in removing dirt - mud, road grime - oil and exhaust soot. It may safely be used to clean paintwork – chrome – rubber – windscreens – fibreglass – aluminium – tarpaulins - vinyl and most washable surfaces. It will not affect paint and being free-rinsing - will not cause streaking.

## PERMATEX®

### AVIATION FORM-A-GASKET® NO. 3 SEALANT

#### LIQUID

P/N 80017

473 ml

- Slow-drying - non-hardening sealant
- Approved for use in aviation as well as automotive applications
- Resists gasoline - oil and grease
- Temperature Range: -54°C to 204°C

Slow-drying - non-hardening brush-top sealant approved for use in aviation as well as automotive applications.

Permatex Aviation Form-A-Gasket No. 3 Sealant Liquid is a slow-drying, non-hardening brush top sealant approved for use in aviation as well as automotive application.
